

MARSHALL CASTILLO

Full Stack Developer

@ me.dev.marshall@gmail.com <https://marshall-castillo.vercel.app/> 📍 Columbus, Ohio, USA

SUMMARY

FULL STACK DEVELOPER
Experienced and skilled in building scalable, high-performance web applications, I specialize in both front-end and back-end development. Proficient in React.js, Node.js, Express, and MongoDB, I deliver seamless user experiences and robust solutions. With expertise in Agile and DevOps, I lead teams, mentor junior developers, and ensure timely, high-quality project delivery. Passionate about solving complex problems and continuously learning new technologies to drive innovation.

LANGUAGES

English Native ●●●●●

SKILLS

- Frontend Development
- Backend Development
- Project Management Public Relations
- Teamwork DevOps Testing
- Soft Skills Time Management
- Leadership Effective Communication
- Critical Thinking
- Version Control & Collaboration

KEY ACHIEVEMENTS

Your Achievement

I delivered scalable full-stack platforms, built and optimized dozens of applications, improved performance and load times, designed secure APIs and microservices, automated deployments and monitoring, integrated major third-party services, strengthened system reliability, and consistently delivered high-quality solutions ahead of schedule.

EXPERIENCE

- Freelancer**

[Upwork | on site](#) 📅 06/2025 - Present 📍 Remote

 - Provided tailored marketing strategies and brand-development solutions to clients across tech, SaaS, and digital-product sectors after completing contract with Palo Alto Networks.
 - Built and executed data-driven marketing campaigns that increased client acquisition rates by 25–40% depending on project scope.
 - Improved brand positioning for early-stage companies, resulting in 15%+ growth in customer engagement within the first 90 days.
 - Developed content and messaging frameworks that boosted lead-conversion rates by up to 30% for long-term clients.
- Senior Full Stack Developer & Team Leader**

Palo Alto Networks 📅 01/2023 - 06/2025 📍 Remote

 - Led a team of 6 developers, delivering high-performance, scalable web solutions that improved product stability and user satisfaction by 22% YoY.
 - Architected and implemented full-stack features using React, Node.js, Express, and MongoDB, enhancing platform efficiency and reducing load times by 28%.
 - Managed and optimized engineering resources and project timelines for initiatives exceeding \$1.2M+ in annual technical scope.
 - Ensured consistent code quality and system reliability across 15+ services, reducing critical production issues by 17%.
 - Collaborated with product, design, QA, and DevOps teams to deliver multi-region feature deployments with seamless integration and minimal downtime.
- Full Stack Developer**

Atlassian 📅 05/2018 - 02/2023 📍 Remote

 - Led full-stack development of web applications using **React, Node.js, Express, and MongoDB**, improving platform performance and stability across multiple product teams.
 - Designed and optimized scalable APIs and microservices, reducing server response times by **35%** and improving system reliability.
 - Built reusable UI components and frontend architectures that improved development speed by **25%** across engineering teams.
 - Ensured consistent brand application across all digital assets, increasing customer trust and reducing user experience inconsistencies by 30%.
 - Implemented CI/CD pipelines, automated deployments, and cloud infrastructure improvements, decreasing deployment errors by **40%**.
 - Collaborated with cross-functional teams to deliver new features, contributing to a **20% increase** in user adoption and engagement.
 - Conducted performance tuning, debugging, and refactoring, reducing production issues by **30%** and enhancing overall code quality.
- Junior Developer**

Freelancer | on site 📅 06/2016 - 04/2018 📍 Remote

 - Assisted in developing and maintaining web applications using JavaScript, HTML, CSS, and early React/Node fundamentals.
 - Fixed bugs, improved UI components, and optimized front-end performance, reducing load times by 20% on key pages.
 - Collaborated with senior developers on API integrations and backend improvements, contributing to 5+ successful product releases.
 - Wrote automated test scripts that improved testing coverage by 25%, reducing recurring issues in production.
 - Gained foundational experience in Agile workflows, Git version control, and full-stack development practices.

TRAINING / COURSES

Completed advanced training in full-stack development, cloud computing, API design, database optimization, cybersecurity fundamentals, CI/CD automation, and modern JavaScript frameworks to stay current with industry best practices.

EDUCATION

Master of Computer Science
Greenwood university

 2015 - 2018  USA
